

Quality Assurance Software Tester

Paulina Sowa

I am a certified quality assurance tester. During a 4-month practical course I mastered writing test documentation such as static reviews, test plans, test cases and bug reports with multiple test management tools. I practised executing functional and non-functional tests, worked with databases and gained experience in API testing. Currently preparing for an ISTQB Foundation Level certification in the near future, I am improving my testing skills in some ongoing projects. Always excited for new challenges I multitask on a daily basis thanks to my highly developed organisation and analytical thinking skills.

Projects

1. **Teatr Nowy - website**; in progress..... [Qase, Jira]
 - Test plan, test cases, functional tests, usability tests, compatibility tests, bug reports, validation and verification, static review.
2. **So Yummy - Web Application**..... [TestRail, Trello, Swagger]
 - Test scenarios, checklists, test cases, functional tests, usability tests, API Tests, bug reports, validation and verification, static review.
3. **Revolut - Mobile Application**..... [uTest Platform forms]
 - Beta tests: executing test cases, functional tests, usability tests, regression tests, retests, bug reproductions, bug reports.
4. **Palia - Game beta tests**..... [Palia website forms]
 - Game testing: exploratory tests, functional tests, regression tests, usability tests, re-tests, bug reports.
